-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 October 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claim 2 is pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 provides the limitation "so that for the Group G and the element g a calculation of a discrete logarithm is essentially impossible." The term "essentially impossible" is a relative term which renders the claim indefinite. The term "essentially impossible" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Allowable Subject Matter

4. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2134

5. The following is a statement of reasons for the indication of allowable subject matter: The present invention teaches a method for establishing a common key between a central station and a group of subscribers. Each independent claim identifies the distinct feature of creating a common key k using a threshold method that takes as inputs random numbers created by each subscriber of the subscriber group. The closest prior art, Lai et al "On the Design of Conference Key Distribution Systems for the Broadcasting Networks" teaches the generating of a common k , but fails to teach the generation utilizing inputs from each and every subscriber. The prior art fails to teach creating a common key k using a threshold method that takes as inputs random numbers created by each subscriber of the subscriber group and thus fails to anticipate or render the above limitations obvious.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Beimel et al US Patent No. 5,764,767 teaches a system for the reconstruction of a secret shared by a plurality of participants.

8. Schwenk et al US Patent No. 5,903,649 teaches a method for establishing a common code for authorized persons through a central office.

9. Harkins et al US Patent No. 6,215,878 teaches a method for group key distribution.
